

Collator

Number of Bins	10, 20, 30, 40, 50, 60
Paper Size (Min./Max.)	4.72" x 5.52" to 14" x 20"
Paper Weight	11 lb. to 12-pt. cover
Bin Capacity	2.5"
Detections	Double-feed, misfeed, paper jam, paper transport jam, bin empty
Speeds	Bookletmaking - up to 5,000 sets per hour Collating - up to 10,000 sets per hour
Feed System	Vacuum belt with air sheet separation
Power Consumption	120V 60Hz 9.5A
Dimensions (LxWxH)	25" x 30" x 78"; 49" x 30" x 78" when connected to the lift unit
Weight	Lift unit - 80 lbs.; each tower - 705 lbs.
Other Features	5-digit display (ascending and descending); twin conveyor vertical paper transport; auto calibration; left or right exit selection; automatic bin selection; 4-step overlap controls; multi-step speed adjustment; block mode (1/2-block, 1/3-block, 1/4-block functions); interleaving sheet insertion; reject tray (right and left); hand-marry unit
Connecting Devices	DBM-500 Bookletmaker, DBM-400 Bookletmaker, DBM-300 Bookletmaker, DBM-120 Bookletmaker, DC-8000ST Rear Stacker, DC-12JR Rear Jogger, DBM-400STR Right Stacker, DBM-400STL Left Stacker
Options	Document Integrity System (Barcode Scanners), Intelligent Multi-bin Feeding System

Bookletmaker

CORNER/SIDE/TOP STITCHING APPLICATION

Sheet Size (Min./Max.)	4.72" x 5.52" to 13.82" x 14.41"
Paper Capacity	Up to 30 sheets**

SIGNATURE BOOKLETMAKING APPLICATION

Sheet Size (Min./Max.)	4.72" x 6.7" to 14" x 20"
Paper Capacity	Up to 25 sheets**

GENERAL

Speed	Up to 5,000 sets per hour*
Detections	Wire draw detection
Number of Stitcher Heads	1-4 (2 standard) Hohner heads
Stitch Positions	Saddle, corner, side, none (fold only)
Programmable Memory Settings	12
Automatic Functions	Stitcher heads, back jogger, side guides, stitch stopper, fold stopper, fold-back stopper positions, small booklet adjustments, fold roller gap, conveyance roller position, center reference, disengage the operator side stitching head when corner stitching
Power Requirements	120V 60Hz 6.5A
Dimensions (LxWxH)	63.38" x 27.55" x 39.56"
Weight	847 lbs.
Other Features	LCD touch panel and ten-key pad; DBM-500T settings adjustable from DBM-500 control panel; accepts set-by-set and sheet-by-sheet; jam clearance accessibility; side and corner stitch catch tray; knife folder with four adjustable fold rollers and insert attachment for inserting loose sheets into booklets; adjustable control panel, external fold skew adjustment
Connecting Devices	DC-10/60 Collator, DBM-500T Trimmer

Trimmer

Trimming Mechanism	Upper and lower shearing action
Booklet Sizes (Min./Max.)	4.72" x 3.35" to 14" x 10"
Trimmed Booklet Sizes (Min./Max.)	4.72" x 3" to 14" x 10"
Trim Margin	Up to 1***
Speed	Up to 5,000 sets per hour*
Power Consumption	120V 60Hz 10A
Dimensions (LxWxH)	23" x 27.5" x 43"
Weight	531 lbs.
Other Features	Jam detectors; adjustable belt in-feed timing; inter-locking safety covers; automatic setting exit rollers; auto knife up/down; bypass for documents that do not need a face trim; trim/no trim; resettable output counter; compressed air to trimmings tray; trim scrap-box-full sensor; drop-away flap for trimmings; full-width head stop; spine compression; automatically adjustable in-feed roller gap
Connecting Devices	DBM-LS1 Extended Conveyor with DBM-K Batch Kicker, DBM-SS1 Short Stacker

Stacker

Sheet Capacity (Min./Max.)	8.25" x 5.5" to 13.77" x 19.68"
Paper Capacity	17"
Speed	Up to 10,000 sets per hour*
Power Consumption	Supplied by collator
Dimensions (LxWxH)	30" x 35" x 35"
Weight	325 lbs.
Other Features	Automatic size change; 13 programmable memory settings; straight or offset stacking; jam and door open detectors

System 5000 Configuration

* Dependent upon connected devices and number of bins in use ** Dependent upon paper weight and size

Production rates are based on optimal operating conditions and may vary depending on stock and environmental conditions. As part of our continuous product improvement program, specifications are subject to change without notice.

SYSTEM 5000

Fully Automatic Bookletmaking System

The Ultimate Finishing Machine

Experience the Ultimate Finishing Machine.

SYSTEM 5000

Introducing the most productive and technologically-advanced collating and bookletmaking solution in the industry . . . *the System 5000!* Redefining the word automatic, Duplo presents the first and only *truly automatic* finishing machine that delivers cutting edge technology and unprecedented speeds of up to 5,000 booklets and 10,000 collated sets per hour. The heavy-duty System 5000 demonstrates superb versatility with its ability to feed up to 12-point cover and a variety of sheet sizes. Fully loaded with a wide range of first-rate features, the System 5000 will turn any novice into a finishing expert.

Superior Feeding System

The high-speed System 5000 collators, expandable up to 60 bins, deliver superior performance while maintaining complete accuracy.

- Two individual, adjustable fans deliver the same amount of air and vacuum per bin.
- Vacuum belt feed system with 40 square inches of contact area for accurate and consistent feeding.
- Immediately and accurately detects double and misfeeds.

2.5" Bin Capacity

Non-stop Productivity

Maximum production is achieved from the moment you hit start.

- Each tower is equipped to operate independently, allowing two jobs to run at the same time in two different output directions.
- The special block mode function allows continuous, on the fly reloading while the towers are in operation.
- Downtime is dramatically reduced as double and misfeeds are diverted into a unique reject tray without stopping or interrupting production.
- Having the largest bin capacity in its class eliminates the need for constant reloading.

Corner and side-stitched jobs are diverted into a separate catch-tray to speed up production.

Not Just a Collator. An Intelligent Feeder.

With an optional touch-screen PC controller and custom designed Duplo software, the towers transform into the IMBF (Intelligent Multi-bin Feeder), enabling the operator to select the bin from which to feed from and the feeding sequence. The IMBF fulfills a variety of applications in the digital printing environment:

- One-to-one marketing material based on a pre-determined database.
- Mailing applications with optional folder/insert unit.
- Inserting selected pre-printed material into black and white and color merging jobs.

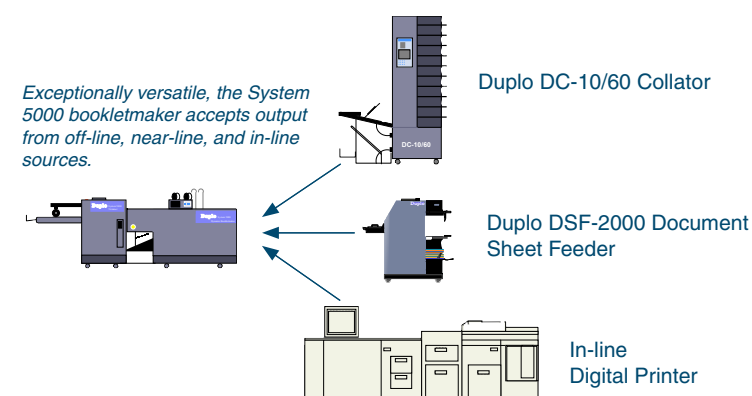

The bookletmaker's main control panel automatically adjusts all functions of the trimmer.

A unique reject tray collects double and misfeeds ensuring non-stop productivity.

Unparalleled Versatility

Incorporating significant technical upgrades, the fully automatic System 5000 bookletmaker is exceptionally user-friendly, versatile, and includes a revolutionary offering that sets itself apart from competitors.

- A state-of-the-art set accumulation system offers complete flexibility by accepting both the set-by-set output of traditional offset printers and sheet-by-sheet pre-collated output of digital printers.
- Developed to meet UP3i standardization, set to become the graphic arts industry standards for machine language, the System 5000 bookletmaker will be connectable in-line to all UP3i compatible digital printers; thus, maximizing your return on investment.

Truly Automatic Finishing

Push-button setup and changeover make the System 5000 bookletmaker the world's easiest to use stitcher/folder.

- Go from 11" x 17" to a CD size book job in only 25 seconds without any additional parts or manual intervention. (This includes the time it takes to adjust the fold roller gap.)
- The bookletmaker's LCD touch panel enables all functions of the trimmer to be controlled from this main unit.
- Easy changeover is achieved by diverting corner or side-stitched jobs to a separate catch-tray, while other jobs continue to pass through the trimmer onto the belt-stacker.
- New Hohner stitcher heads, side guides, back joggers, fold stopper, and even the fold roller gap are adjusted by a push of a button. No manual adjustments and additional parts are necessary.
- Input up to 12 frequently used jobs for effortless changeover.

A Sound Investment

Among the multitude of features that set the System 5000 above and beyond its competition, the bookletmaker also boasts a redesigned fold unit that provides a flatter, crisper fold. Engineered to meet your every demand, this revolutionary machine is the fastest, easiest, most economical and accurate method available for turning printed material into quality finished documents.

The simple to use touch-screen, keypad, and LED display allows for easy navigation and programming.
